

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 (Currently amended). A graphical user interface for a personal video recorder comprising:

(a) simultaneously presenting on a display, a plurality of different key frames, each key frame associated with a respective different video separately recorded onto a storage medium of said personal video recorder, and representative of a clip within the respectively associated different video, ~~each video separately recorded by said personal video recorder~~, each video clip and key frame automatically selected by said personal video recorder by analyzing the content of the respectively associated video recorded on said storage;

(b) presenting on said display, a plurality of sequential frames of one of said video clips, beginning from the first frame of the presented one of said video clips, in response to a user selecting a key frame associated with the presented one of said video clips ~~clip~~; and

(c) presenting title information, length information, quality information, and source information regarding at least one of the presented one of said video clips ~~clip~~ and the video associated with the presented one of said video clips ~~clip~~.

2 (Canceled).

3 (Currently amended). The interface of claim 1 wherein said plurality of different key frames is presented in a two dimensional array.

4 (Currently amended). The interface of claim 1 wherein the selection of one of said video clips is based upon, at least in part, the selection of a second video clip.

5 (Currently amended). A graphical user interface for a personal video recorder comprising:

(a) simultaneously presenting on a display, a plurality of different key frames, each key frame associated with a respective different video separately recorded onto a storage medium of said personal video recorder, and representative of a clip within the respectively associated different video, ~~each video separately recorded by said personal video recorder~~, each video clip and key frame automatically selected by said personal video recorder by analyzing the content of the respectively associated video recorded on said storage;

(b) presenting on said display, a plurality of sequential frames of one of said video clips, beginning from the first frame of the presented one of said video clips, in response to a user selecting a key frame associated with the presented one of said video clips clip;

(c) wherein the selection of one of said video clips is based upon, at least in part, the selection of a second video clip.

6 (Canceled).

7 (Currently amended). The interface of claim 5 wherein said plurality of different key frames is presented in a two dimensional array.
